Regulatory Liquidity Disclosures

Liquidity Coverage Ratio (LCR) for the period ended 31st March 2023

Introduction

In June 2019, the Central Bank of Bahrain (CBB) issued the regulations to banks operating in Bahrain on the reporting of the Liquidity Coverage Ratio (LCR) as part of the Basel III reforms.

The main objective of the Liquidity Coverage Ratio (LCR) is to promote the short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient level of high-quality liquid assets (HQLA) to cover net outflows and survive a significant stress scenario lasting for a period of up to 30 calendar days. Under the requirements, the Bank is required to maintain an LCR requirement of at least 100% on a daily basis.

High Quality Liquid Assets (HQLA) Portfolio

HQLA eligible securities, fall into three categories: Level 1, Level 2A, and Level 2B liquid assets. Level 1 liquid assets, which are of the highest quality and deemed the most liquid is subject to no or little discount (or haircuts) to their market value and may be largely used without limit in the liquidity buffer. Level 2A and 2B securities are recognised as being relatively stable and reliable sources of liquidity, but not to the same extent as Level 1 assets. LCR rules therefore set a 40 per cent composition cap on the combined amount of Level 2A and Level 2B securities that firms may hold in their total eligible liquidity buffer. Level 2B liquid assets, which are considered less liquid and more volatile than Level 2A liquid assets, are subject to large and varying haircuts and may not exceed 15 per cent of the total eligible HQLA.

Outflows & Inflows

Expected outflows are generally calculated as a percentage outflow of on-balance sheet items (e.g. funding received) and off-balance sheet commitments (e.g. credit and liquidity lines) made by firms. The % of outflow varies typically by counterparties per the liquidity rules.

Expected inflows are also generally calculated as a percentage inflow on-balance sheet items and include inflows (e.g. from corporate or retail loans) that will be repaid within 30 days. To ensure a minimum level of liquid asset holdings, and to prevent firms from relying solely on anticipated inflows to meet their liquidity coverage ratio, the prescribed amount of inflows that can offset outflows is capped at 75 per cent of total expected outflows.

The cash-outflows were driven primarily by unsecured wholesale funding and inter-bank borrowings.

The Bank utilises internal Risk Appetite Statement thresholds ("RAS") which act as early warning indicators and safeguards to ensure LCR is maintained above the regulatory minimum requirements at all times.

Quantitative Disclosure

The Bank continued to maintain a strong average LCR position over the reporting period with a prudent surplus to both Board approved risk appetite and regulatory requirements. The Bank's average LCR was 224% in Q1 2023 (compared to Q4 2022: 247%) driven by stable HQLA holdings and lower net cash outflows, reflecting the Bank's focus on high-quality liquid assets and aligned with overall growth in the Group's balance sheet and external liquidity environment.

19	Other cash inflows	198	198	113	113
20	Total Cash Inflows	1,975	1,422	1,717	1,173
	Cap on cash inflows	75%	2,080	75%	1,854
	Total cash inflows after applying the cap		1,422		1,173
			Total adjusted value		Total adjusted value
21	Total HQLA		3,032		3,204
22	Total net cash outflows		1,351		1,299
23	Liquidity Coverage Ratio (%) Average		224%		247%

** In accordance with the CBB liquidity module, LCR presented above is a simple average of daily LCR of all working days during Q1 2023 and Q4 2022 respectively.

The above ratio is reported at Domestic Liquidity Group (DLG). ie, at aggregate level for Bank ABC Parent and ABC Islamic Bank.

The DLG LCR ratio as at 31st March 2023 was 252.3% (31st December 2022: 311.6%)

Net Stable Fund Ratio (NSFR) for the period 31st March 2023

Introduction

In August 2018, the Central Bank of Bahrain (CBB) issued the regulations to banks operating in Bahrain on the reporting of the Net Stable Funding Ratio (NSFR) effective 31 December 2019. The purpose of this disclosure is to provide the information pursuant to CBB's Liquidity Risk Management module LM 12.5 "General Disclosure Requirements".

The NSFR is a balance sheet metric which requires institutions to maintain a stable funding profile in relation to the characteristics of their assets and off-balance sheet activities over a one-year horizon. It is the ratio between the amount of available stable funding (ASF) and the amount of required stable funding (RSF). ASF factors are applied to balance sheet liabilities and capital, based on their perceived stability and the amount of stable funding they provide. Likewise, RSF factors are applied to assets and off-balance sheet exposures according to the amount of stable funding they require. As per the CBB liquidity disclosure requirement, the Consolidated NSFR is to be published on a quarterly basis. At the last reporting date, the Group NSFR remained above 100 per cent.

The Bank utilises internal Risk Appetite Statement thresholds ("RAS") which act as early warning indicators and safeguards to ensure NSFR is maintained above the regulatory minimum requirements.

Quantitative Disclosure

At 31 March 2023, the Bank's NSFR was 112.5% (31st December 2022 : 111%), above the regulatory minimum. Available Stable Funding as of 31st March 2023 was around US\$ 10.8 billion (31st December 2022: US\$ 10.7 billion) as against US\$ 9.6 billion (31st December 2022: US\$ 9.6 billion) of Required Stable Funding.

The drivers of available stable funding include Bank ABC's robust capital base, substantial and reliable wholesale funding from customers and a retail deposits in MENA units. Required stable funding include financing various customers including non-financial corporates, sovereigns, PSE's , financial institutions and retail and small business customers. Bank ABC's HQLA requires minimal funding mainly due to the significant component of Level 1 assets in the portfolio.
